## Contents

|   |           |
|---|-----------|
| Preface   | ix        |
| Acknowledgments   | xi        |
| <b>Chapter 1 Pharmaceutical Industry Overview</b>                         | <b>1</b>  |
| 1.1 Introduction  | 2         |
| 1.2 Regulations   | 2         |
| 1.2.1 Health Insurance Portability and Accountability Act                 | 2         |
| 1.2.2 The Code of Federal Regulations                                     | 3         |
| 1.2.3 Guidance for Industry   | 4         |
| 1.2.4 International Conference on Harmonisation of Technical Requirements | 5         |
| 1.2.5 Clinical Data Interchange Standards Consortium                      | 6         |
| 1.3 Documentation   | 7         |
| 1.4 Standard Operating Procedures   | 7         |
| 1.4.1 Companywide Standard Operating Procedures                           | 7         |
| 1.4.2 Department Standard Operating Procedures                            | 8         |
| 1.4.3 Task Standard Operating Procedures                                  | 8         |
| 1.5 SAS Programming Guidelines  | 9         |
| 1.6 Quality Control versus Quality Assurance                              | 9         |
| 1.7 Patient versus Subject  | 10        |
| 1.8 Conclusion  | 10        |
| <b>Chapter 2 Validation Overview</b>                                      | <b>11</b> |
| 2.1 Introduction  | 12        |
| 2.2 Validation versus Verification  | 12        |
| 2.3 Why Is Validation Needed?   | 13        |
| 2.3.1 Presenting Correct Information                                      | 13        |
| 2.3.2 Validating Early Saves Time   | 13        |
| 2.3.3 Developing a Positive Relationship                                  | 14        |

|            |  |           |
|------------|--|-----------|
| <b>2.4</b> | <b>How Do You Approach Validation?</b> | <b>14</b> |
| 2.4.1      | Start with All the Information         | 14        |
| 2.4.2      | Have a Plan                            | 15        |
| 2.4.3      | Make the Code Do the Work              | 16        |
| 2.4.4      | Ask Questions                          | 16        |
| 2.4.5      | Be Proactive                           | 16        |
| 2.4.6      | Validation Must Come First             | 17        |
| <b>2.5</b> | <b>Validation Methods</b>              | <b>17</b> |
| 2.5.1      | Independent Programming                | 18        |
| 2.5.2      | Peer Review                            | 19        |
| <b>2.6</b> | <b>Validation Checklists</b>           | <b>20</b> |
| <b>2.7</b> | <b>Software Development Life Cycle</b> | <b>21</b> |
| <b>2.8</b> | <b>Conclusion</b>                      | <b>22</b> |

### **Chapter 3 Documentation and Maintenance 23**

|            |                                       |           |
|------------|---------------------------------------|-----------|
| <b>3.1</b> | <b>Introduction</b>                   | <b>24</b> |
| <b>3.2</b> | <b>Starting the Process</b>           | <b>25</b> |
| 3.2.1      | Study Protocol                        | 25        |
| 3.2.2      | Annotated Case Report Form            | 26        |
| 3.2.3      | Statistical Analysis Plan             | 29        |
| 3.2.4      | Meeting Minutes                       | 31        |
| <b>3.3</b> | <b>Internal Program Documentation</b> | <b>32</b> |
| 3.3.1      | Program Header                        | 32        |
| 3.3.2      | Body Comments                         | 34        |
| 3.3.3      | Output Titles                         | 35        |
| <b>3.4</b> | <b>External Documentation</b>         | <b>35</b> |
| 3.4.1      | Data Definition Tables                | 35        |
| 3.4.2      | Program Directory                     | 36        |
| 3.4.3      | Validation Files                      | 37        |
| <b>3.5</b> | <b>Make Programs Maintainable</b>     | <b>38</b> |
| 3.5.1      | Create and Follow Naming Conventions  | 38        |
| 3.5.2      | Make It Easy to Read                  | 38        |

|                  |  |           |
|------------------|--|-----------|
| 3.5.3            | One Program, One Purpose                           | 42        |
| 3.5.4            | Comments, Comments, Comments                       | 43        |
| 3.5.5            | Use Macros Judiciously                             | 44        |
| 3.6              | Make Data Maintainable                             | 44        |
| 3.6.1            | Order Your Data                                    | 44        |
| 3.6.2            | Label Everything                                   | 49        |
| 3.6.3            | Attach Formats Sparingly                           | 50        |
| 3.6.4            | Consistency Is Key                                 | 51        |
| 3.6.5            | Good Housekeeping                                  | 51        |
| 3.6.6            | Look—but Don't Touch                               | 53        |
| 3.7              | Conclusion   | 56        |
| <br>             |  |           |
| <b>Chapter 4</b> | <b>General Techniques to Facilitate Validation</b> | <b>57</b> |
| 4.1              | Introduction                                       | 58        |
| 4.2              | Validation Tools                                   | 58        |
| 4.2.1            | Procedures   | 58        |
| 4.2.2            | SAS Options and Language Elements                  | 67        |
| 4.2.3            | Using Macros Effectively                           | 72        |
| 4.3              | Techniques That Facilitate Validation              | 80        |
| 4.3.1            | Start with a Clean Log                             | 80        |
| 4.3.2            | Print Only What You Need—When You Need It          | 81        |
| 4.3.3            | Tracking Problems                                  | 82        |
| 4.3.4            | Using PROC TRANSPOSE or an Alternative Solution    | 85        |
| 4.3.5            | Tracking Dropped Data                              | 89        |
| 4.4              | Conclusion   | 93        |
| <br>             |  |           |
| <b>Chapter 5</b> | <b>Data Import and Export</b>                      | <b>95</b> |
| 5.1              | Introduction                                       | 96        |
| 5.2              | Validating the Import Process                      | 96        |
| 5.3              | Validating the Export Process                      | 98        |
| 5.4              | General Items to Watch For When Transferring Data  | 99        |

|                  |  |            |
|------------------|--|------------|
| 5.5              | Working with SAS Files                               | 100        |
| 5.5.1            | SAS Data Sets  | 100        |
| 5.5.2            | SAS Transport Files                                  | 101        |
| 5.6              | Working with Other File Types                        | 102        |
| 5.6.1            | Microsoft Excel Files                                | 102        |
| 5.6.2            | Flat Files   | 103        |
| 5.7              | Common Procedures Used for Validating Data Transfers | 104        |
| 5.7.1            | PROC CONTENTS  | 104        |
| 5.7.2            | PROC COMPARE   | 108        |
| 5.8              | Conclusion   | 112        |
| <br>             |  |            |
| <b>Chapter 6</b> | <b>Common Data Types</b>                             | <b>113</b> |
| 6.1              | Introduction   | 114        |
| 6.2              | Study Populations                                    | 114        |
| 6.2.1            | Safety   | 115        |
| 6.2.2            | Intent-to-Treat                                      | 115        |
| 6.2.3            | Efficacy   | 116        |
| 6.3              | Common Data Domains                                  | 116        |
| 6.3.1            | Subject Demographics                                 | 116        |
| 6.3.2            | Inclusion/Exclusion Criteria                         | 117        |
| 6.3.3            | Subject Disposition                                  | 118        |
| 6.3.4            | Medical History                                      | 118        |
| 6.3.5            | Physical Examination                                 | 120        |
| 6.3.6            | Vital Signs  | 120        |
| 6.3.7            | Treatment Exposure                                   | 122        |
| 6.3.8            | Concomitant Medications                              | 123        |
| 6.3.9            | Adverse Events                                       | 124        |
| 6.3.10           | Clinical Laboratory Data                             | 126        |
| 6.4              | Conclusion   | 137        |

|   |            |
|---|------------|
| <b>Chapter 7 Reporting and Statistics</b>           | <b>139</b> |
| 7.1 Introduction                                    | 140        |
| 7.2 Pre-Output Validation Steps                     | 140        |
| 7.2.1 Code Review                                   | 140        |
| 7.2.2 Log Review                                    | 141        |
| 7.3 Output Validation Steps                         | 142        |
| 7.3.1 Understanding the Data                        | 142        |
| 7.3.2 Understanding the Output                      | 143        |
| 7.3.3 Checking the Result                           | 143        |
| 7.3.4 Cross-Checking Related Output                 | 146        |
| 7.3.5 Checking the Cosmetics                        | 153        |
| 7.3.6 Updating the Specifications                   | 157        |
| 7.3.7 Keeping What Is Important                     | 157        |
| 7.4 Final QC Steps                                  | 158        |
| 7.5 Conclusion                                      | 158        |
| <br>  |            |
| <b>Appendix A Sample Quality Control Checklists</b> | <b>159</b> |
